

Vicmap Position

What is happening

Vicmap Position currently includes the GPSnet™ infrastructure & services managed and maintained by the Survey General Victoria.

This change broadens Vicmap Position to include Survey Control as a foundational dataset.

A table SMES_FULL has been added to Vicmap Position. The table holds point data depicting the State's database of permanent and cadastral survey marks, which may also be referred to as survey monuments, survey benchmarks or geodetic marks.

Why this change is occurring

To enable the search and discovery of survey mark data maintained by the Surveyor General Victoria and made available in compliance with the DataVic Access policy.

Who will it affect

This change positively affects all users of Vicmap by broadening and increasing the accessibility of survey mark data for Victoria.

This data is used by the Land and Survey Spatial Information (LASSI) spatial platform that the Survey Mark Enquiry Service (SMES) depends and remains unchanged.

When the change will occur

The change has been implemented and the data is now available.

How to provide feedback

For Vicmap Product change notices and bulletins, go to the News and Bulletins page.
